Tableau Software Wins 2006 Editors Choice Award

Recognized as One of the Most Influential Companies in the Business Intelligence Industry by Intelligent Enterprise Magazine

SEATTLE, July 1, 2006 – Tableau Software, the global leader in visual analysis software, today announced it has been selected by Intelligent Enterprise Magazine as a “Company to Watch” in 2006. Intelligent Enterprise is one of the most respected publications in the business intelligence industry.

Tableau’s products enable people of any technical ability to ask questions of and get answers from their data. The products transform raw data into smart decisions using a drag and drop process that creates vivid, interactive visualizations. By analyzing data visually, people can spot trends, outliers, and relationships more quickly, leading to better insights.

“We are delighted to be recognized by Intelligent Enterprise Magazine,” said Christian Chabot, CEO and Co-founder. “Our dramatic growth over the last year signals that customers are achieving immediate gains by using Tableau. The world’s leading companies are telling us they can now see and understand business information like never before.”

About Tableau Software

Tableau Software, a privately held company based in Seattle, Washington, is the global leader in visual analysis software. Its flagship product is used by managers, business

intelligence professionals, business analysts, strategic consultants, financial professionals, market researchers, scientists and engineers in nearly every industry. For more information, visit www.tableausoftware.com.
